Size:	190.5 x 78.74 x 68.58 cm
Durability:	Patient load 181.43 kg
Color:	Black
Country of origin:	USA
NATO Stock number:	N/A
Quantity:	1
Weight:	7 kg

SR901 multi-purpose utility table can be utilized to provide a lightweight and compact operating table to far forward remote areas allowing doctors to stabilize casualties and operate when necessary and prior to transport.

The SR901 Model and all of its variants are designed to accommodate a NATO approved stretcher and form an "operating room capable" appliance for patient exam, treatment or surgical procedure in a far forward/surge medical application

An assembly time of between 15 to 25 minutes is normal and the carry case makes the unit very portable and able to be man carried.

- At 78 Lbs. (35.5 Kg), as packaged, it can easily be handled and set up by one person.
- Once assembled, the SR901RT table can be moved easily with a net weight of 69 Lbs.(31 Kg)
- Each of four legs of the SR901RT has a manual adjustment that allows the table to be raised or lowered a total of 5 inches (in one inch increments). This same feature allows the table to be adjusted for uneven floors in challenging terrain.
- Trendelenberg capability allows the patient head end of the stretcher to be lowered or the foot end to be lowered as required
- The SR901RT stand is designed with a minimum of holes or openings in the stand tubes and supports to facilitate decontamination wash-down.
- The removable stretcher features allows for a fresh, clean stretcher to be installed before each patient.
- The absorbent fluid capture blanket will absorb and retain up to 3 liters of fluid without leakage. A water-proof fluid collector can be installed with drain hole for decontamination applications

The SR901RT + KIT A & B comes with:

Raven 90C Stretcher

With "SR901 Accessory Kit A" the necessary accessories to provide patient critical care which includes IV poles, arm boards, MAYO tray with Corrosion resistant stainless steel tray capable of high temp sterilization.
