Certificates:	N/A
Size:	L: 78 cm , B: 52 cm og H: 67 cm
Color:	Available in: Light and Dark
Country of origin:	China
NATO Stock number:	N/A
Quantity:	4
Weight:	22 kg

The Little Anne CPR training manikin is durable and designed for convenience making hands-on practice possible for every student.

Little Anne is constructed with realistic anatomical parts that provide life-like and educationally effective CPR training.

- A realistic airway construction means that the airway naturally remains obstructed without the use of proper head tilt, chin lift or jaw thrust. This leads to more realistic training as chest rise will be seen when correct ventilations are made.
- Little Anne's anatomically correct torso and sternal notch allow the student to practice identification of all anatomical landmarks relevant to conducting adult CPR training.
- Realistic oral and nasal passages allow for mouth-to-mouth ventilation.

A practical and durable construction allows unequalled long-term use.

- Economical disposable airways for quick and easy clean-up.
- Removable and reusable faces for convenient and affordable maintenance.
