

Lifeline AUTO

SPECIFICATIONS:

Manufacturer:	Defibtech
Certificates:	CE Mark, TÜV
Size:	8.5 x 11.8 x 2.7 inches (22 x 30 x 7 cm)
Color:	Yellow/black
Country of origin:	USA
NATO Stock number:	N/A
Quantity:	1
Weight:	With DBP-1400: 4.2 lbs (1.9 kg) With DBP-2800: 4.4 lbs (2.0 kg)

Saving a life could not be easier: turn the unit on and the AUTO will do the rest. If the unit recognizes that a shock is needed, it will automatically shock the patient.

Saving lives, while rewarding, can be stressful. A calm voice leads the user through the rescue, clearly and concisely stating each instruction, one step at a time. Brightly lit progress lights provide clear visual text guidance to reinforce voice instructions.

Two long life batteries are available: a 5 year battery that will deliver 125 shocks or work continuously for 8 hours or a 7 year battery, unique in the industry, which will deliver 300 shocks or work continuously for 16 hours.

Lightweight, fully integrated design with no lids or moving parts that would confuse or delay a rescue; a roomy handle big enough even for gloved hands, and rubberized surfaces to ensure a sure grip in an emergency.

The actively illuminated status indicator shows unit readiness, to ensure that the unit is ready to perform anytime, everytime.
