

Lifeline PRO AED

SPECIFICATIONS:

Manufacturer:	Defibtech
Certificates:	CE Mark, TÜV
Size:	7.3 x 9.5 x 2.3 Inches (18.5 x 24 x 5.8 cm)
Color:	Yellow/black
Country of origin:	USA
NATO Stock number:	N/A
Quantity:	1
Weight:	Less than 3 lbs (1.4 kg) (with battery)

Meet the AED that's taking easy-to-use to a whole new level. The Lifeline VIEW family of defibrillators are the first and only AEDs with video in full-motion color. The Lifeline PRO offers professional responders full manual capabilities. With award-winning design, durability, and easy maintenance — backed by the Defibtech commitment to innovation and excellence — we can guarantee you've never seen an AED like this before.

The Lifeline PRO allows the professional responder full manual control over shock energy and shock delivery. The ECG is clearly displayed on a large, brightly lit, high-resolution color display.

They say a picture is worth a thousand words; now multiply that with the power of video. The Lifeline PRO has a large, full-color interactive display that gives step-by-step instructions for performing CPR, rescue breathing and external defibrillation.

The Lifeline PRO allows the professional user to view the ECG while in AED mode.

The professional user can use an optional 3-lead monitoring adaptor for enhanced ECG monitoring.

Saving lives, while rewarding, can be stressful. Even if you are trained, in an emergency situation, will you remember what to do and how to do it? The Lifeline PRO, in AED mode, has videos that show you how to perform a specific part of a rescue, or can display the ECG.
