

# Lifeline VIEW AED

---

## SPECIFICATIONS:

Manufacturer:	Defibtech
Certificates:	CE Mark, TÜV
Size:	7.3 x 9.5 x 2.3 Inches (18.5 x 24 x 5.8 cm)
Color:	Yellow/black
Country of origin:	USA
NATO Stock number:	N/A
Quantity:	1
Weight:	Less than 3 lbs (1.4 kg) (with battery)

Other AEDs tell you what to do in an emergency. The Lifeline VIEW is the first and only one that shows you--with video in full-motion color. With award-winning design, durability and easy maintenance - backed by the Defibtech commitment to innovation and excellence - we can guarantee you've never seen an AED like this before.

They say a picture is worth a thousand words; now multiply that with the power of video. The Lifeline VIEW has a large, full-color interactive display that gives you step-by-step instructions for performing CPR, rescue breathing and external defibrillation.

Saving lives, while rewarding, can be stressful. Even if you are trained, in an emergency situation, will you remember what to do and how to do it? The Lifeline VIEW has videos that show you how to perform a specific part of a rescue.

While you are in the middle of the rescue, you may not remember how many compressions to provide and the timing between each one. The Lifeline VIEW has a built-in metronome that counts out the beat so you know what to do and when to do it.

Not all rescuers are the same. Some people do compression-only CPR. Others may be trained to do both compression and rescue breathing. Real Time Protocol Selection allows you to switchover from one to both without skipping a beat, giving you the comfort and confidence to deliver emergency care your way.
