each Individual Bleeding Control Kit contains

The top cause of preventable death in trauma is bleeding... 20% of people who have died from traumatic injuries COULD HAVE SURVIVED with quick bleeding control!

Life threatening bleeding can occur from emergency situations in our communities everyday. From vehicle crashes and incidents involving farming equipment or public transportation to accidental injuries from natural disasters like tornadoes or inflicted injuries from intentional acts of violence like shootings and bombings, uncontrolled bleeding can result in death within minutes – even before emergency medical services or other emergency responders can arrive. These first minutes following a traumatic injury are crucial in saving a life.

To address today's growing concerns, North American Rescue has designed this convenient kit to equip bystanders with the essential medical tools needed to take immediate action in life threatening emergencies. Contained in a ruggedized, vacuum-sealed pouch, this life saving kit provides intuitive and easy-to-use tools that are proven to help to save lives such as the same Tourniquet and Hemostatic Dressing technology recommended by the U.S. Military & the American College of Surgeons Committee on Trauma to control bleeding. Also included are step-by-step illustrated "Just in Time" pictorial instructions.

- 1 x C-A-T® Tourniquet, Orange
- 1 x QuikClot® Hemostatic Bleeding Control Dressing
- 1 x 4 in. Flat Responder ETD (Emergency Trauma Dressing)
- 1 x Pair, Bear Claw Nitrile Gloves, Lg
- 1 x Just in Time Instruction Card
