The Xtract™SR System is designed to:

- Reduce secondary injury and secure life-saving interventions.
- Be strong and light, providing a viable option for rescuers evacuating casualties from the point-of-wounding.
- Provide rescuers with configurable options depending on mission parameters.

The requirements of training for all Xtract™SR System products are similar, making it straightforward for organisations to adopt.

Provides solution to:

- Limited space & weight.
- Adverse weather.
- Making the injury worse.
- Rescuers' fatigue.
- Features to cross.
- Continuing care.
