

SMART TRIAGE

SMART TRIAGE boasts an indispensable range of equipment that promotes a systematic response which enables rapid triage at any scene. Proven invaluable in enhanced crisis control, the equipment has been used in British Military for over 12 active years seeing service in Afghanistan and Iraq.

Fitting over any duty belt, the **SMART TRIAGE PAC™** offers the ultimate practical solution to effective on scene triage containing 20 **SMART MIST TAG™**s, one **SMART TAPE™** and light sticks.

NSN: 6545-99-808-8807
 SMART SIX: **SMART** Triage Pac™

The **SMART MEDIC PAC™** contains five **SMART MIST TAG™**s and two light sticks and is compact enough to fit in a medics bag. Made of durable plastic it is designed to be squash proof.

NSN: 6545-99-936-3353
 SMART FIVE: **SMART** Medic Pac™

The **SMART MIST TAG™** is the most comprehensive triage tag on the market. With a design based on operational feedback, the folding design is quick and simple to use providing an effective tool for rescue personnel.

XTRACT®2

Xtract®2
 IS A SOLUTION
 FOR RAPID CASUALTY
 EXTRACTION

The **Xtract®2** allows seriously injured casualties to be removed quickly and safely reducing exposure in hostile locations. It is lightweight, robust and adaptable to suit all individuals. The **Xtract®2** represents years of research and practical experience.

The **Xtract®2** is a true innovation in casualty evacuation. Stretchers typically weighing 8-10kgs, the **Xtract®2** weighs in at 1.5kg and can be packed compact.

Designed to fit casualties of all heights, it can be quickly adjusted to fit heights from 3ft 8in - 6ft 10in.

Xtract®2 has eight carry handles with a patented elasticated securing system. The lightweight design allows rescuers to quickly carry or drag to a safe location.

FOR TRIAGE THAT WORKS

TSG Associates are the world's leading innovators in triage and multiple casualty equipment

“Smart equipment has been used successfully and extensively by the UK Defence Medical Services in recent operations”

Brigadier T Hodgetts CBE QHP OStJ MB BS MMed FRCP FFAEM FIMCRSCSEd FRGS L/RAMC, Defence Professor of Emergency Medicine

We have developed a scaleable system which assists military personnel take the concept of triage and make it operationally effective

“...once the immediate threat of further injury from hostile fire has been reduced to a minimum level, the casualties ought to be taken care of in order of priority”

LTC Cliff Cloonan Military Medicine, VOL.165, supplement 1

SMART CasEvac™

Designed exclusively from operational feedback, the **SMART Cas Evac™** provides both a MIST report and the 9liner in an easy to use report card format.

Now built into SMART Triage modules, the **SMART Cas Evac™** assists with the handover of essential information along the chain of evacuation.

EU Registered Community Design 001646712-0001

SMART TAPE™

Providing the only evidence based system for paediatric triage, the **SMART TAPE™** enables a rapid, safe and effective triage of injured children.

An increasing number of military personnel are required to render aide to injured children making the **SMART TAPE™** a robust tool for objective prioritisation of paediatric casualties.

NSN: 6545-99-535-9335
SMART SEVEN: SMART Tape™

SMART COMMANDER™

The compact size of the **SMART COMMANDER™** allows for flexible response. The detachable control boards enable an ordered reporting system and an efficient handover that speeds up decision making.

Designed for ease of use, the **SMART COMMANDER™** acts as a mobile command point providing a structured response to multiple casualty incidents.

NSN: 6545-99-520-9302
SMART FOUR: SMART Commander™

SMART MCI BAG™

The **SMART MCI BAG™** is a complete grab bag that enables a rapid response of a multiple casualty event by combining all the resources required to manage the scene.

The equipment helps bring order to a chaotic environment by providing direction through a management structure that aids command and control.
