Certificates:	CE, Sterile
Lengths available:	15,2 x 8,2cm
Country of origin:	USA
NSN no:	N/A
Tariff:	N/A
Weight:	11g

EZ-IO® provides the medical professional immediate vascular access to the central circulation within seconds, delivering medications, intravenous fluids and blood products to adult and pediatric patients. With a specially designed cutting IO needle, manual driver, or small power driver, the EZ-IO® allows the clinician complete control — avoiding the use of force. EZ-IO® provides rapid, smooth entry into the bone's medullary cavity, creating an immediate conduit to the central circulation.

The EZ-IO® Intraosseous Infusion System is the leading choice for intraosseous access across multiple health care settings, and is used by 90 percent of US advanced life support ambulances, over half of US Emergency Departments, and the US Military.
