Weight:	123g

The OLAES® Modular Bandage is the newest generation of trauma bandages and is advantageous for all levels of care providers.

Packed with features such as 3 meters of gauze, a removable occlusive plastic sheet behind the trauma dressing pad, and a pressure bar that can also act as an eye cup, the advanced capabilities of the medical bandage are tucked neatly away and can be utilized if required or simply ignored.

No hooks or clips to confuse or delay care. Velcro® 'Control' strips prevent the elastic roll from accidentally unraveling and secure the emergency bandage throughout the application process.
