Country of origin:	USA
NSN no:	N/A
Tariff:	30059099
Weight:	240 g

The ATS Medical Pouch-Small is an advanced design that exceeds the current standard for individual first aid kits. When seconds count, standard trauma equipment can be difficult to access because most pouches stay attached to the vest or pack of the casualty. The most revolutionary feature of the Medical Pouch Small is that it can be instantly removed from its MOLLE compatible backing platform and then used independently as the situation dictates.

The pouch is arranged as a "clam-shell" zippered design with elastic webbing on the interior in order to organize the trauma supplies in a consistent fashion. There's also an interior slot pocket for smaller items. The ATS Medical Pouch Small will fit everything in the issue IFAK and more.
