Weight:	59 g

A Combat Application Tourniquet makes a significant difference in a life or death situation as it is designed to stop bleedings on extremities.

The C-A-T tourniquet design offers the same benefits to EMS users as it has over the past years for America's military soldiers. With its Velcro and safety buckle, and correct training the C-A-T Tourniquet can easily be operated by one hand only.

The C-A-T Tourniquet is made of a special composite material. C-A-T is approved by CoTCCC.
