| Size: | N/A |
| Color: | Brown |
| Country of origin: | US |
| NSN no: | 6910-01-706-0307 |
| Tariff: | 30059099 |
| Simulator Weight: | 27 kg |
| Package Weight: | 32,6 kg |

The K-9 Medical Simulator is designed for classroom integration, trauma lanes and field training scenarios.

The K-9 Medical Simulator is designed for classroom integration, trauma lanes and

field training scenarios. Multiple appendage options present a variety of wounds including gunshot, blast and burns to provide full mission profiles in combat scenarios, disaster re-creations and mass casualty events.

This K-9 Simulator is developed, and manufactured, by North American Rescue Simulation and enhances Tactical Combat Casualty Care (TCCC) instruction from Point of Injury to transfer of higher care. This all-in-one system allows instructors to build multiple realistic traumatic casualty scenarios with reactive patients. A 1-year warranty is included with each simulator.
